# A LEAN, CLEAN DRIVING MACHINE.

---

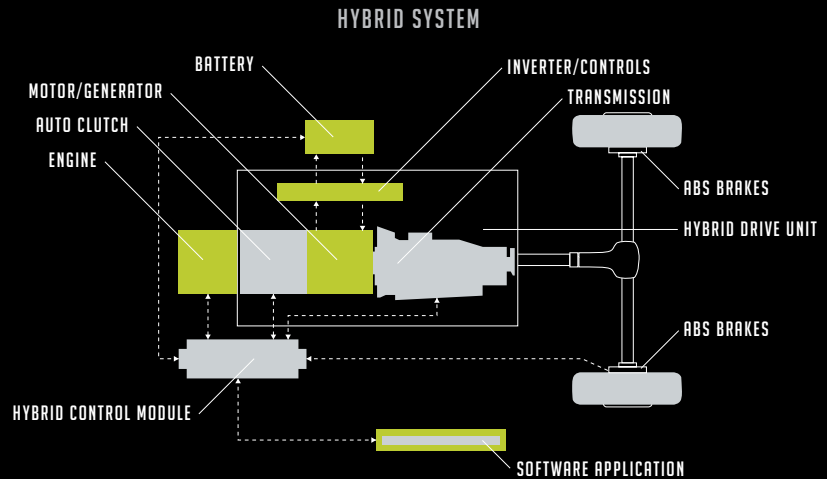

You'll go a lot further on a lot less fuel with the industry-leading HC Series hybrid electric bus from IC Bus. Powered by a MaxxForce® DT diesel engine in combination with a clean, reliable and efficient Eaton Electric Parallel Drive Hybrid System, the HC Series Hybrid provides customers with a bus that's able to reach up to 32% improvement in fuel economy. And while you're saving money, you'll be helping the environment with up to 35% reduction of NOx emissions and up to 85% reduction of particulate matter.

Yet none of this comes at the cost of performance or functionality. The HC Series hybrid electric bus has 660-860 lb-ft torque capacity, as well as a 44kW electric motor located between the engine and the automated manual 6-speed transmission. Plus, regenerative braking recharges batteries and leads to reduced braking and engine wear. It's clear that IC Bus has got you, your passengers and the future covered with this state-of-the-art, powerful, green driving machine.

For more information about our HC Series hybrid electric commercial bus or to locate the nearest IC Bus™ dealer, call 1.800.892.7761 or go to [ICBus.com](http://ICBus.com)

# THE HC SERIES HYBRID COMMERCIAL BUS

## HEV PACKAGE
